

## YESstation 4G

### Virtual Endpoint Simplicity

Introducing our new YESstation 4G (611X Series) Intel based thin client. The 4G is the perfect solution for any new or existing host endpoint and is available with all major operating systems. Harness the true power of your virtual environment with System-on-Chip (SoC) and make PC management a thing of the past. Less power and less maintenance compared to a PC, along with industry leading durability make the new 4G perfect for your environment. These devices were engineered with harsh environment durability in mind and have a proven reliability for such applications. The 4G uses an industrial grade metal chassis, has no moving parts, is expandable, and provides support for all major PC peripherals. The 4G, along with the rest of the Affirmative thin client family members, are backed with Affirmative's industry leading advanced replacement 3-year limited warranty.

The YESstation 4G is designed to easily be introduced and adapted to multi-vendor environments. No matter if you are considering IBM terminal replacements or full-fledged VDI deployments, Affirmative has all aspects covered. Affirmative offers comprehensive management software that makes managing YESstations simple. From deploying new firmware or software updates to remote control, Affirmative makes management easy and more cost effective, yet again reducing the overall total cost of ownership.

The YESstation 4G integrates well in office environments where attractive styling and silent operation are important. It has an exceptionally small footprint with its vertical orientation and optional VESA mount which frees up valuable desk or bench space. The 4G's standard colors are black and silver which match Affirmative input devices including 122-key specialty keyboards specifically designed for IBM 5250/3270 application.

### Why Affirmative thin clients?

Affirmative Thin Clients are a cost effective alternative to the PCs and workstations widely deployed in business operations. They are somewhat less expensive to buy, but extremely less expensive to operate and maintain. Thin clients have no disks drives to crash, no viruses, no productivity-robbing games or movies, and no unauthorized file transfer. Since data is not stored locally, thin clients provide an ultra-secure environment if one is lost or stolen; also all YESstation models can be physically secured with a Kensington lock.

Thin clients also support local printers and other PC peripherals, such as scanners and wireless LAN adapters. They allow the user to work with Windows, web browsers, UNIX, and IBM mainframe applications without moving any files to the local desktop. This eliminates the concern for local backups and unauthorized applications. Affirmative thin client power consumption is only 10% of a typical PC reducing total electrical cost.

611X chassis

A complete array of ports makes the platform versatile

## YESTation 4G Hardware Specifications

### Items

Processor

I/O Peripheral & Communication

Other Support

Optional Module Support

Display

Memory Support

Environmental Temperature

Relative Humidity

Power

Regulatory Compliance

Dimensions (WxDxH)

Weight

### Specifications

Intel Baytrail 2.0 Ghz Quad core SoC solution

10/100/1000 Mb Ethernet (RJ45)

PS/2 Mouse Port

PS/2 Keyboard Port

Ten USB Ports (Front x2, Rear x4, Internal x4) (USB 3.0)

HD Integrated Audio (Rear) (Optical SPDIF Out)

-Rear Speaker/Central Bass/Line in/Front Speaker/Mic

PCI Express 2.0 & Mini PCIe expansion slot

PXE Enabled on BIOS

Built-in Auto. Power-on

Wake On LAN

Kensington Lock Support (x1)

Internal Wireless LAN Module

Mini PCI-e Slot Riser Card

Smart Card Reader

VESA Mounting Kit

DVI-D/VGA/HDMI-Dual Video/Wide Screen Support

DDR3 SO-DIMM 1333/1066Mhz (2 ch-64 bit) (Max 16GB)

Flash Memory: SATA DOM

Operating: 5° C to 35° C (41° F to 95° F)

Storage: -10° C to 60° C (14° F to 140° F)

90% Maximum, Non-Condensing

External Power Supply, 100-240 Volts AC, 50-60 Hz, 12V

FCC, CE, UL-Approved, ROHS, GS

8.3 x 7.8 x 1.7 in

4.8 Pounds

Optional VESA Mount

Optional Wireless Module

### Model 6116 Linux

-ATG No Touch Linux (Ubuntu)

-1GB DDR3 RAM/1GB SATA DOM Flash

### Model 6117 WES7 (Windows 7 Embedded Standard)

-2GB DDR3 RAM/8GB SATA DOM Flash

-YESterm II TN5250 emulation w/fat finger buttons (optional)

### Model 6118 WES8 (Windows 8 Embedded Standard)

-2GB DDR3 RAM/8GB SATA DOM Flash

-YESterm II TN5250 emulation w/fat finger buttons (optional)
